

Name: Eleanor Aimee O. Reantaso

Course & Year: BSIS 2B

Subject: IS ELEC 2 - Web Systems

Professor: Guillermo Red

Week 2 — Semantic & Multimedia

This week taught me how to use semantic elements such as `<header>`, `<nav>`, `<section>`, and `<footer>` to organize my content more clearly and meaningfully. I also learned how to embed images and videos properly into webpages. My biggest challenge was understanding when to use each semantic tag — they all seemed similar at first. I overcame this by looking at examples and drawing simple layout plan before writing any code. I improved my page structure by separating different parts of the website logically, making my code easier for others to read and understand too.
